Ms. Christie True  
Metro Industrial Waste Section  
Senior Industrial Waste Investigator  
130 Nickerson Street Suite #200  
Seattle, WA. 98109-1658

Dear Ms. True:

Per our conversation of July 6, 1993, the results of our composite sample for June 17-18 were high in chromium. After closer examination, it was discovered that some of our newer employees were not cleaning the shavings from our end prep station allowing the shavings to get washed into the process system and increasing our chromium content. These employees have been further trained so we do not anticipate this problem in the future.

Sincerely,

ALASKAN COPPER WORKS
